Targeting RET in Thyroid Cancer: Optimising Testing and Treatment Strategies

Tuesday 7 September 2021 15:15–16:15 (CEST)

15:15	Welcome and Introduction	Chair - Laura Fugazzola, Italy
15:20	Detecting RET Alterations in Thyroid Cancer: Molecular Diagnostic Approaches	Fernando López-Ríos, Spain
15:35	Integrating RET Inhibitors in RET-Driven Thyroid Cancer: An Overview	Matthias Weber, Germany
15:47	Take Action with RET Inhibitors: Clinical Case Discussion	Ellen Kapiteijn, Netherlands
15:57	Live Panel Discussion and Q&A	All panel
16:12	Symposium close	Chair - Laura Fugazzola, Italy

Symposium Objectives

- Educate on the latest evidence regarding diagnostic options to identify RET-driven thyroid cancer and support HCPs in making appropriate treatment decisions for their patients
- Accelerate the translation of clinical evidence into clinical practice for patients with RET fusion-positive thyroid cancer as well as RET-mutated medullary thyroid cancer
- Facilitate the exchange of clinical experience in the management of RET-driven thyroid cancer

This symposium will be broadcast at the above time through the ETA 2021 virtual congress platform and will subsequently be available for viewing “on-demand”

Please note that registration to the ETA 2021 virtual congress is required for access
